

mk Media Transport

Where should it go?

Benefits for your patron:

- Operates at less than 58 db so that patrons are not disturbed
- Improve return and sorting workflows. Fast circulation of holds and other media

Benefits for your library:

- A specially designed material transport system to fit your building's floor requires less floor space than standard decline conveyors and curves.
- Long life, low maintenance components
- High-level compatibility allows integration into existing systems
- When used with return stations, fully automatic return and sorting, improving return workflows
- Proven components ensure a reliable and efficient workflow in your library
- Span multiple levels using **media lifts**
- Items move automatically from floor to floor
- Shelves move in a continuous loop, moving materials efficiently between floors

Technical Details:

- Dimensions Media lift:
L 25 x W 60/67 in. (L 640 x W 1.500/1.700 mm)
- Modular Anodized aluminum framework with Lexan guarding
- Custom designed to meet library specifications
- Capacity: to 2,000 items per hour
Vertical: to 1,500 items per hour
